SUMMARY

Full-stack web developer with hands-on experience building production automation tools with React, Next.js, and TypeScript. Shipped a document-processing system (SheetJS, Docx, PDF.js, Tesseract.js) that cut manual workload by 20% in a live business environment. Comfortable across the stack, from REST APIs and PostgreSQL/MongoDB data layers to CI/CD deployment on Vercel.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, React, Next.js, Node.js, Python, Django

Data & APIs: PostgreSQL, MongoDB, Prisma ORM, REST API development

Tooling & DevOps: Git, GitHub, CI/CD pipelines, Vercel deployment, debugging & maintenance

Automation Libraries: SheetJS, Docx, PDF.js, Tesseract.js (OCR), Excel/Word document automation

UI & Styling: Tailwind CSS, Framer Motion, responsive & accessible component design

Other: Microsoft Office & Google Workspace, Citrix Workspace, Microsoft Teams

EXPERIENCE

Data Entry Specialist / Legal Assistant | Global Strategic Business Process Solutions *Apr 2025 - Present*

- Designed and built a web-based Excel and Word automation system with React, Next.js, and TypeScript, using SheetJS, Docx, PDF.js, and Tesseract.js — cutting manual document workload by 20%.
- Automated OCR-based data extraction and document generation workflows for high-volume legal case files, improving turnaround and accuracy.
- Supported attorneys with legal data entry, document preparation, and electronic court filings, working within strict compliance and deadline requirements.

Junior Web Developer Intern | Cloudwalk Digital Inc. *Sep 2024 - Dec 2024*

- Built responsive web applications using Next.js, React, TypeScript, and Tailwind CSS; developed reusable, accessible UI components.
- Supported deployment workflows using Git, GitHub, CI/CD pipelines, and Vercel.

EDUCATION

Bachelor of Science in Information Technology — *Cum Laude*
Institute of Creative Computer Technology, Cainta Campus | Jan 2021 - Dec 2024

LANGUAGES

Filipino: Native

English: C2 - Proficient

PROJECTS

ALAW Projects — *Global Strategic Business Process Solutions*
Next.js, React, TypeScript, Tailwind CSS, Tesseract.js, Excel.js, PDF.js

- Built a suite of internal automation tools for legal document processing, replacing manual data entry with OCR-driven extraction and templated document generation.
- Automated PDF data extraction and Excel report generation for high-volume case files, and streamlined file transfer between systems — reducing manual document handling by roughly 20%.

Lume E-Commerce— *Personal*
Next.js, React, TypeScript, Tailwind CSS | lume-ecommerce.vercel.app

- Built a Shein/Shopee/Amazon-style e-commerce frontend from scratch, including a home feed, category browsing, product listing, and product detail views.
- Focused on responsive, mobile-first layout and clean UX patterns common to major e-commerce apps — grid-based product cards, filters, and a cart-style flow.

LMS x AAI — *Cloudwalk Digital Inc.*
Next.js, React, TypeScript, Tailwind CSS, Prisma, PostgreSQL, NextAuth, REST APIs, MongoDB | cwd-lms.vercel.app

- Built a full-stack learning management system supporting course creation, assignments, and quizzes, with a relational data model in PostgreSQL via Prisma ORM.
- Implemented authentication and role-based access control with NextAuth, exposing REST APIs so admins, teachers, and students each get a tailored view and permission set.

Surf x Bini — *Cloudwalk Digital Inc.*
Next.js, React, TypeScript, AWS, Cloud Storage, CMS Architecture, Tailwind CSS, Prisma, PostgreSQL | bini-con.vercel.app

- Built a full-stack content platform with a custom CMS architecture, allowing structured content to be created, managed, and published without direct code changes.
- Integrated AWS cloud storage for media/file handling and modeled content relationships in PostgreSQL via Prisma, with a responsive Tailwind CSS front end.

Randomizer — *Cloudwalk Digital Inc.*
Next.js, React, TypeScript, Tailwind CSS, Framer Motion | randomizer-cwd.vercel.app

- Developed an interactive spin-wheel web application for random selection and giveaways, with dynamic wheel generation based on a configurable list of entries.
- Added customizable options (entry weighting, colors, labels) and smooth, physics-based spin animations with Framer Motion for a polished, responsive UI.

CloudCast — *Personal*
Next.js, React, TypeScript, Tailwind CSS, MongoDB | cloudcast-sy.vercel.app

- Built a responsive weather application with a full-stack login system, third-party weather API integration, and MongoDB for managing user credentials and stored application data.
- Designed the UI to be lightweight and fast, focusing on straightforward content management and reliable delivery.

Personal Portfolio
Next.js, Tailwind CSS | joshuas.vercel.app

- Designed and built a responsive personal portfolio site to showcase development projects, technical skills, and background.
- Deployed on Vercel with a focus on fast load times and clean, minimal presentation.
